TITUS NURSERY COMPANY

(The Waynesboro Nurseries) WAYNESBORO, VA.

New Low Prices

FRUIT TREES, ORNAMENTALS, LANDSCAPE SERVICE of the highest quality on the Golden Rule Terms! The manner in which our old customers have stuck to us—many of them since we started in business—and the phenomenal growth we have enjoyed, assure us that you have been pleased with our stock and service. We solicit your continued business on these terms. We invite you who have not seen our stock, or used it, to give us a trial.

OUR STOCK AND PRICES. In keeping with the general trend of the times, we are lowering our prices, but we are maintaining the fine high grade of our plants and service. Take advantage of these lowered prices to plant your orchard or landscape your home grounds. For the benefit of those who are willing to use smaller grades and wait for the growth, we offer our "Mail Order Grade." The plants are just as healthy, and are guaranteed to be true to name and to be delivered in good condition. Usually it is advisable to plant the larger sizes, but if you prefer the smaller plants, you will find our "Mail Order Grade" plants well developed, well rooted, and full of life.

SHIPPING AND GUARANTEE. We pay transportation charges on our nursery stock to your nearest railroad point or to your post office, and we guarantee our plants to be first class, true to name, and to be delivered in good condition. When you place your order you can expect to receive exactly the varieties you order and that the plants will be fine, thrifty, and well rooted. Then too, we will replace at one-half price any which may fail to live the first season.

TERMS. For cash in full with order, we allow 5 per cent discount, or a liberal premium in free stock. No discount is allowed unless cash in full accompanies order, but orders are accepted and booked when 25 per cent of the amount of the order accompanies the same.

VARIETIES AND QUANTITIES. In case you do not find listed the variety, quantity or grade desired, write us for further information and our descriptive Catalog.

MAKING UP ORDERS. Do not fail to give sizes, quantities, and varieties wanted. Also give shipping point if different from post office, and approximately when you would like your stock shipped. **Six at dozen rate; 50 at 100 rate; 300 at 1000 rate.**

NOTICE OF WARRANTY. While we are very careful to keep our varieties true to name, in the event they should prove otherwise, we cannot be responsible for more than the amount we receive for the stock.

Fruit Trees

Planters in various communities demand different sizes and varieties, so we offer a large list of both. All of our stock is clean, healthy, and true to name, and bears a "State Certificate of Inspection." We are especially careful to keep our stock true to name. You should be equally as careful to plant true-to-name trees. Our list of varieties is carefully worked out. Whether you are planting a commercial orchard or a small home orchard, you can make a suitable selection from our list.

VARIETIES

Albemarle Pippin. Yellowish green. Winter.
Ben Davis. Well known red winter Apple. Poor quality but popular for export market.
Black Ben. Resembles Ben Davis, but much darker in color and same quality.
Bonum. Red fall Apple, medium size, excellent quality for export.
Delicious. Red and green striped. One of the best known winter varieties. Excellent quality.
Duchess. Red summer Apple. Popular in home orchards as well as being a commercial variety.
Early Harvest. Well known early greenish yellow Apple. Good in its season.
Fall Pippin. Yellow. An old-time fall Apple having a place in every home orchard.
Gano. Improved Ben Davis: fine shipper and keeper.
Grimes Golden. The most popular late fall and early winter yellow Apple.

Herndon and Pangborn of trans-Pacific air fame, landed at Wenatchee, Washington, where the Richard Delicious originated. Above shows them preparing to sample this wonderful new apple.

Nearly half a million peach trees in our nursery. Photo July 25, 1931.

Grimes Golden, Double Worked. Budded twice to overcome collar-rot. 10c. above standard varieties.

Hyslop Crab. Excellent for jellies.

Jonathan. A late fall, solid red export Apple. Much in demand for exporting.

King David. Another medium-size red late fall Apple.

Mammoth Black Twig. Large dark red. Long keeper. Good quality. Rather shy bearer.

McIntosh. Late fall and winter red Apple. Popular in New York and the New England States.

Northern Spy. An old favorite in the home orchard. Late fall. Red striped Apple.

N. W. Greening. Large winter green Apple.

Paragon. Resembles Black Twig but is more abundant bearer.

Rome Beauty. A well-known striped winter Apple. Very near sweet.

Smoke House. One of our best-known summer Apples. Splendid home variety.

Stayman. One of our most popular commercial Apples of the winter varieties. Large red, green striped.

Summer Rambo. Undoubtedly one of the best summer varieties of its season. Large, striped, excellent quality. Ripens in August.

Virginia Beauty. Resembles Delicious in quality and shape: darker and extra fine quality.

Wealthy. Fall red Apple. Planted chiefly for export.

Williams Red. Another popular export Apple. Early fall, medium size and red.

Winesap. Standard commercial variety. Medium size. S. S. 1.

Yellow Transparent. The earliest Apple on our list. A very popular early Apple. Medium size and excellent for cooking purposes.

York Imperial. The most extensively planted Apple in Virginia for commercial purposes. Greenish background, red cheek, good quality and keeps well. 15.

Blaxtayman (The New Solid Red Stayman). A solid red Stayman. Sport of the well-known Stayman, having all the good qualities of the Common Stayman and the big advantage of being solid red in color instead of pale striped greenish coloring found in the Common Stayman. Write for further information.

Lowry. Beautiful dark red winter Apple, enjoying the reputation of selling for the highest price of any Apple grown in Virginia. It sells for \$1.00 to \$2.00 more per barrel than standard varieties. Always in demand both as a home variety and a commercial Apple. The Lowry should be in every orchard, whether home or commercial. Trees 10c. above Standard Varieties.

Richard Delicious. A "Super" Delicious. An Apple with all the good qualities of the Common Delicious: Same size, same shape, same flavor, same texture and same ripening period, but the Richard Delicious colors two to three weeks earlier and colors solid red without trace or sign of stripe, even into the stem and blossom ends. It can be picked "hard ripe" with full color. It has excellent storage qualities and is the most beautiful Apple ever seen. Write for further information.

Spy Rooted Trees

Resistant to root rot. If you have lost trees from root rot use our Spy Rooted Trees for replants. They are resistant to root rot and will insure you of much longer life trees. We can furnish the Spy Rooted Trees in the following varieties: Albemarle Pippin, Delicious, Stayman, Winesap, York. Write for further information.

Peach Trees

We are located in the heart of the Commercial Peach belt of Virginia, and grow Peach trees in large quantities. Our soil is well adapted for the growing of Peach trees, both in the nursery and orchard.

Elberta Peach.

Peaches, therefore, have become one of our specialties. So that we might be in position to better advise the commercial peach growers we are continuously studying the different varieties to learn their bad as well as their good points. As far as possible we have eliminated the unworthy varieties, and list only those which have special merit. The result is a shorter, but more desirable list.

Our peach trees are budded on seedlings obtained from seeds of the native peach trees found through Virginia and North Carolina along the Blue Ridge Mountains. We have found that by using these seedlings as roots or understocks we develop harder and sturdier trees.

For your convenience we are listing our Peaches in ripening order. If better descriptions are needed, write for our descriptive catalog.

Consult Our Landscape Department

"We maintain a staff of experienced Landscape Architects and field men. Consult them; their services are yours for the asking."

Ornamental and Landscape Department

From our selection of choice Shrubs, Evergreens, Shade Trees, Roses, Tuberous Plants and Perennials, a selection can be made suitable for any requirement.

Landscape Service. We employ a professional landscape architect and a number of practical well trained field men whose services are always available for our customers. If we can be of any service to you do not hesitate to call on us.

Our standard grade of stock is grown chiefly for the larger landscape developments and is not to be compared to light Mail Order Grades often quoted. Even the smaller stock we list as "Mail Order Grade" is well rooted, branched, and much of it will give immediate effect.

Make use of our Landscape Department. We have established it for your benefit and it is at your command. If too far away for one of our landscape men to see you, send in measurements of your grounds and a photo of the house for suggestions.

Privet Hedge

A privet hedge is much cheaper than a fence and is much more attractive. It not only serves the purpose of a fence, but is decidedly more ornamental. Do not confuse our privet hedge with the lighter grades often offered as of the same height. Our privet has been grown in nursery rows for two or more years and has been cut back to the ground after its first year. It has many more branches and a much better root system. Therefore, our plants will make a beautiful hedge in a shorter time than the light plants of equal height.

CALIFORNIA PRIVET

The most extensively planted privet hedge. Too well known to need description.

Evergreens

All Coniferous Evergreens are Dug with a Ball of Earth and Wrapped in Burlap

Evergreens are requisite in present-day landscaping. Few plantings are complete without them. They are delightfully beautiful the year round. In spring, when they start their new growth, they are most interesting. During the summer they present an excellent background for flowering shrubs, and during the winter their live green color adds an expression of cheerfulness and warmth.

We take great pride in our evergreens and our method of preparing them for our customers. We shear them carefully to make them uniform, compact specimens. When we prepare them for shipment we take them up with the soil in which they were grown and tie the soil firmly about the roots with burlap and rope. You will find that our evergreens will grow almost without exception.

We pay transportation charges.

Chinese Elm

4 Year Old Chinese Elm.

Graceful as the Birch. Rapid growing as the Poplar. Beautiful as the Maple. Recently introduced by the United States Department of Agriculture and pronounced by Department in Yearbook of 1926;

's a shade, windbreak, and avenue tree, the se Elm has proved to be the most successful introduction of this kind thus far attempted. "It is a rapid grower, with slender, almost wiry branches. It is one of the first trees to leaf out in the spring, and the last to shed its leaves in the fall. Throughout the long season the leaves remain a beautiful green and are remarkably free from the usual plant diseases and insect injuries so common in many of the other Elms."

Unlike the old varieties, the Improved Varieties bloom throughout the fall. Every garden should have Canna beds.

Double Hollyhocks.

Gladiolus

The Gladiolus continues to be our most popular cut flower. No flower is more easily grown. Gladiolus bloom within ten weeks from time of planting and continue to bloom through late summer and fall. They should be planted at intervals of about two weeks apart. By making your first planting the first of May and continuing planting at intervals of every two weeks until the middle of July, you can have blossoms from middle of July until frost.

By all means plant some of the Autumn Queen. This odd variety should be planted in early spring in order to get best results. Unlike most of the other varieties, the Autumn Queen will bloom from the first of September until frost. The spikes will often be 3 to 4 feet long.

Good Mixture, 75c per doz.; \$4.00 per 100.
